

## Managing Passcode for Zoom Cloud Recording

By default, Zoom creates a passcode for a cloud recording, which is a different passcode from the meeting invite. When students access the recordings from **Cloud Recording** page of the **Zoom** tab in Brightspace, they can see the passcode. To edit/ remove passcode, please follow these steps.

- 1. Go to https://zoom.us and login with your SMU Zoom account.
- 2. From the left panel click on **Recordings**.

3. From the top panel of the Settings page, go to **Recording.** 

4. On that page scroll down and toggle the option **Require passcode to** access shared cloud recordings off.

Require passcode to access shared cloud recordings
Passcode protection will be enforced for shared cloud recordings. A random passcode will be generated which can be modified by the users. This setting is applicable for newly generated recordings only.
