

Saint Mary's is upgrading the technology for managing bubble-sheet exams:

Remark Test Grading

	What is Remark?	Remark is a software application to help you print, mark, and grade bubble-sheet exams
	Why is this technology changing?	Our previous bubble sheet hardware, Scantron, is obsolete, unreliable, and is no longer supported by the vendor
	How does it affect instructors?	Software Application Support (SAS) Centre staff will continue to scan your bubble sheets and send you a grading report. Contact SAS to learn more about receiving bubble sheets.
	When will the change take effect?	Remark will launch in the Fall 2023 Semester
	Where can I learn more?	Website: studio.smu.ca/remark Contact SAS: Atrium 107 sas@smu.ca
